Increase awareness and responsiveness

Syn-Apps continues to enhance the features and functionality of SA-Announce. Alerts are delivered instantly to the DNC, reducing response times and improving your ability to reach registered on-premise users.

DNC provides the following features:

- Auto-registration with SA-Announce
- Cross-platform compatibility
- Locked screen override with audio*
- Unicast and Multicast audio
- Dynamic group assignments
- Custom message templates
- Notification history
- Sender validation

DNC Features & Benefits

Receive notifications from SA-Announce, including:

- **Live Paging:** Normal Groups
- **Stored Audio:** Emergency Alerts, Scheduled alerts, and Record-N-Play group types
- **Text Messages:** Standard text messages and polls
- **AMBER Alerts**
- **CAP (Common Alerting Protocol)**
- **Weather Alerts:** National Weather Service alerts (watches, warnings, and advisories)
- **Images**

Locked Screen Override: Alert computers in locked mode with audio alerts*

Initiate Notifications: Authorized users can initiate Emergency Alerts, Texts, Images, and Audio Messages from DNC

Cross-Platform Compatibility: Supported on Windows and Macs

Dynamic Group Assignment: Automatically assign clients to an SA-Announce notification group based on certain filters. This feature drastically reduces group management as clients are automatically added to groups.

Client Customization: Create notifications unique to your organization with centralized templates and image library

Message History: Browse previously received messages

Sender Validation: Validate all messages ensuring the sender is authorized to use DNC

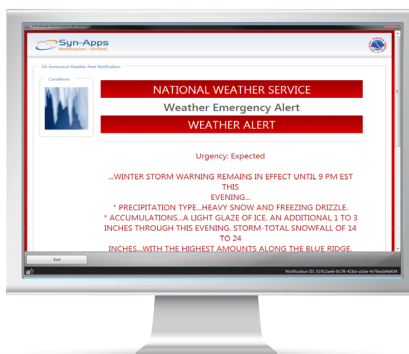

Audio: Unicast or Multicast audio reception

The Perfect Fit for Any Environment

As the most flexible and scalable desktop notification solution on the market, DNC fits into any environment with ease:

- Education K-12
- Higher Education
- IT Services
- Healthcare
- Retail
- Telcos
- Manufacturing
- Government (Federal, State, Local)
- Hospitality
- Finance & Legal
- Construction
- Transportation

DNC combined with Syn-Apps' software and hardware solutions enables enterprise-wide paging and notification delivery for every scenario.

*Supports Windows only

TECHNICAL SPECS

The following lists technical requirements and compatibility specifications:

Windows PC:

- Windows 7, 8, & 10
- 32 and 64-bit supported
- Java installed
- Windows Audio Device
- SA-Announce version 8.0+
- Administrative access to client machine

Mac OS:

- Supports Mac OS X 10.4+
- Java installed
- 64-bit OS
- MAC audio enabled
- SA-Announce version 8.0+
