

# Partners & Resellers

## Corporate Capabilities Statement

### What We Do

Syn-Apps is a leader in notification solutions designed to improve business processes, increase safety and streamline internal and external communication. Since 2001, thousands of organizations have integrated our notification and call-recording products with phones, paging systems, IP speakers and hundreds of other internal systems and services.

Our flagship product, SA-Announce, provides a single point of activation to reach a large variety of voice, graphic and text-enabled devices. Whether informing thousands of people, or ensuring one person receives a critical message, SA-Announce empowers organizations to lower response times and improve productivity through streamlined communications.

### Partner Network Mission

Syn-Apps is dedicated to building close relationships with our partners to generate long-lasting business opportunities. Our mutual customers benefit from our combination of technical knowledge, along with Syn-Apps' software expertise.

We succeed only if our partners succeed. Our Partner Network Program exemplifies thirteen years of strong commitment to our partners and mutual customers. Our mission is to drive awareness, accountability, and safety through partners who are willing to invest their time and commitment in building business relationships together.

Partner Network

### Partner Voice

*"As a technology integrator looking for solutions, Affiliated Communications turned to Syn-Apps to help us complete a request from a large government agency for text notification*

*and voice paging to over 1,000 Avaya IP phones on the Communications Manager PBX platform.*

*The end result is that the customer was extremely happy with the final product, and continues to use Syn-Apps SA-Announce to notify users. The responsiveness, courtesy, and professionalism of the team at Syn-Apps is beyond reproach, not to mention the excellent products they develop.*

*I highly recommend Syn-Apps for advanced paging and notification solutions."*
